GENERAL SAFETY RECOMMENDATIONS

GENERAL SAFETY RECOMMENDATIONS CATERPILLAR D7E

Drawing 1 of 1

Some illustrations in this manual may show details or attachments which may be different from your winch. Also, some components may be removed for illustrative purposes.

Continuing product improvement may cause changes in your winch which may not be included in this manual. When a question arises regarding your winch or this manual, contact your nearest PACCAR dealer or the factory Service Department at 918-251-8511, Monday - Friday, 8:00 a.m. to 4:30 p.m. CST, or by Fax at 918-259-1575. Provide the complete winch model number and serial number when making inquiries. The model and serial numbers are stamped into the winch housing on the upward facing surface near the forward most mounting flange.

PACCAR provides parts and service through a network of authorized dealers. Parts and service are not available directly from the factory. For the name of your nearest dealer, consult your local phone directory or call us at the phone number shown above.

⚠ WARNING ⚠

Make sure the tractor is secured so that it cannot roll away and the engine switched off before starting ANY work on the hydraulic system.

⚠ CAUTION ⚠

The hydraulics may only be operated or serviced independently by persons who are over the age of 18, are physically and mentally fit, and have been instructed on how to operate and service hydraulic systems

⚠ WARNING ⚠

The hydraulic system may be under high pressure. It must therefore be depressurized as specified in the operating instructions before starting any work on the hydraulic system.

⚠ CAUTION ⚠

Beware of injuries when attempting to locate leaks. Always use a piece of paper or cardboard for this purpose, never your hands. Fluid emerging under pressure may not be visible but can penetrate the skin and cause serious injuries which must be treated by a medical professional without delay.

⚠ WARNING ⚠

Hydraulic hose lines must be examined regularly. The hoses must be replaced if damaged or deformed and upon expiry of their service life. The hose lines must comply with technical specifications of the supplier.
