Reference: A-02

This diagram shows the exploded view of a 1.5 HP outboard motor assembly. The main components are the upper unit (cylinder head, piston, crankshaft, and gear assembly) and the lower unit (lower gear case, propeller, and trim/tilt mechanism). The diagram includes numerous numbered callouts (1 through 55) identifying individual parts such as screws, bolts, washers, nuts, and the main engine components. The parts are arranged in a way that shows their relative positions and how they fit together to form the complete outboard motor.
